Recommendation letter for Fitch Fuel Catalyst

Dear Mr. Lambert,

As requested we hereby send you the performance report after installation of **Fitch Fuel Catalyst** on KM Ombak Putih and KM Ombak Biru.

PT. Ombak Putih is a company operating 2 phinisi cruising ships in the Indonesian archipelago. We mainly visit the islands east of Bali as far as Irian Jaya, and we offer diving cruises to Komodo National Park.

The KM Ombak Putih has as main engine a Detroit diesel V8 at 365 HP and one Perkins genset. The KM Ombak Biru has as main engine a Hyundai V8 at 425 HP and 2 gensets; Mitsubishi 6HD and Mitsubishi 4HD. For all of these machines we have installed a **Fitch Fuel Catalyst**.

Our concerns were sound level and vibration from our engines, as well as the smoke level. Although we already installed all available fuel filter systems and D-bugs we saw little improvement.

Especially the sound and vibration levels were disturbing to our guests.

After installation of the **Fitch Fuel Catalyst**, the sound level has gone down drastically, which is of great benefit to the comfort of our guests.

Vibrations and smoke has also been reduced significantly as well due to the use of **Fitch Fuel Catalysts**.

On average fuel consumption has dropped 12% on the Ombak Putih and 17% on the Ombak Biru. With ever rising fuel costs in Indonesia and the great amount of fuel we use per year the economical savings are substantial.

The advantages of using the **Fitch Fuel Catalyst** are multiple for our company; increasing the comfort level for our guests AND saving money on fuel spending.

We at PT. Ombak can highly recommend the **Fitch Fuel Catalyst**; it really made a difference for us! We also like to thank Mr. Hans Lambert for his professional advice and great customer care.

Best regards,

Guido Brink, Managing Director

P.S. : I also installed a Fitch Fuel Catalyst in my private car Toyota Land Cruiser 1982, and the performance increase is really noticeable!
